HIGHER EDUCATION

The future begins here

The brightest days of learning lie ahead with an array of tertiary education opportunities.

Honouring top accounting talent

THE Malaysian Institute of Certified Public Accountants (MICPA) and Chartered Accountants Australia and New Zealand (CA ANZ) honoured outstanding graduates and top-performing students at the MICPA x CA ANZ Excellence Awards 2026, held on July 4.

The ceremony recognised individuals who excelled academically in the MICPA x CA ANZ Qualifying Programme, a joint professional accountancy qualification that awards graduates dual membership with two of the region's most respected professional accounting bodies.

Graduates also gain access to the Global Accounting Alliance (GAA), enhancing international career opportunities through a globally recognised professional network.

Adapting to a digital business landscape

The Qualifying Programme, which was revamped in 2022 to keep pace with the evolving profession, places greater emphasis on ethics, technology, artificial intelligence, data analytics and sustainability.

Beyond traditional examinations, the programme incorporates coursework, workshops and collaborative learning to develop analytical thinking, practical application and the professional skills required in today's workplace.

The event brought together proud family members, employers, scholarship sponsors and friends to celebrate the achievements of 285 award recipients and graduates.

MICPA president Foong Mun Kong and CA ANZ group executive for policy and international, Geraldine Magarey, presented completion certificates to 149 graduates who successfully completed the Qualifying Programme across Terms 1 to 4 of 2025.

A total of 22 gold medals were awarded to candidates who achieved the highest marks in the 2025 professional examinations.

Sponsored by Approved Training Employers, the medals recognise academic excellence while highlighting the important role these organisations play in providing the mentored practical experience required for candidates to qualify as certified public accountants and chartered accountants.

Representatives from BDO, Deloitte, EY, Folks DFK, KHR, KPMG and PwC presented the awards.

Highlighting the nation's top achievers

The ceremony's most prestigious accolade, the Most Outstanding Student Award, recognises the top three candidates who recently completed the MICPA x CA ANZ professional exams.

The MICPA x CA ANZ Excellence Awards 2026 honoured outstanding graduates and top-performing students.

The gold award was presented to Nur Izzah Inshirah Azmi Nassaruddin, a graduate of Universiti Teknologi MARA (UiTM) with a Bachelor of Accounting.

A recipient of the MICPA Educational Trust Fund scholarship, she earned Certificates of Merit in Financial Accounting and Reporting, and Strategy and Business Performance.

Her impressive list of achievements includes being named Best Accounting Graduate under the Malaysian Institute of Accountants' National Accounting Student Excellence Award 2024.

During her studies at UiTM, she received the Vice-Chancellor's Award in 2025, the Top Achiever Award from 2020 to 2022, and Dean's List recognition from 2020 to 2024. She is currently an Associate at PwC.

The Silver Award went to Tan Jia Yi, who holds a Bachelor of Commerce from Victoria University. She was previously awarded the Jeffrey Cheah Entrance Scholarship and the Jeffrey Cheah Ace Scholarship.

Throughout the Qualifying Programme, she achieved high distinctions in three subjects, distinctions in another three, and received a Certificate of Merit for one subject. She is currently an Audit Associate at STH & Co.

The bronze award was presented to Nurhusnina Ahmad Damiri, a PETRONAS scholar and graduate of the International Islamic University Malaysia (IIUM) with a Bachelor of Accounting. She achieved High Distinctions in four subjects during the Qualifying Programme and is currently a Senior Associate at PwC.

The event also recognised six outstanding graduates who were awarded with MICPA Educational Trust Fund scholarships to pursue the MICPA x CA ANZ Qualifying Programme.

The recipients were Chan Swee Hong (Universiti Tunku Abdul Rahman (UTAR), Elisa Maisara Binti Zulkifli (Universiti Kebangsaan Malaysia), Lee Jing Wei (Universiti Malaya), Lim Kwong Yau (UTAR), Britney Ten Ying Xi (Swinburne University of Technology, Sarawak), and Zanlina Sofean (IIUM).

The achievements of all the graduates reflect not only academic excellence but also the dedication, resilience and professionalism that will serve them well as the next generation of accountants contributing to Malaysia's business community and beyond.

Bright future in management

MANAGEMENT is the art and process of organising, planning, decision-making, leading, motivating and controlling an organisation's human, financial, physical and information resources to achieve goals efficiently and effectively.

Good management not only drives performance, but also forms the foundation of strong teamwork and is the key to any successful organisation.

Designed for those aspiring to build a successful career in management and administration, the Diploma in Management at MSU College offers a comprehensive business education enriched with essential soft skills.

This programme equips students with the knowledge and abilities required for management roles, while providing a solid foundation in key areas of organisational management, including communication, leadership, marketing and finance.

In addition to academic knowledge, students are nurtured to uphold strong moral values and integrity as they carry out their duties and responsibilities. This well-rounded approach ensures that they are not only competent but also ethical future professionals.

A strong foundation in all related fields further prepares students for deeper exploration at the bachelor's degree level.

Entry into this two-and-a-half-year programme requires a minimum of three credits in any subjects in Sijil Pelajaran Malaysia (SPM) subjects or equivalent certificates.

Upon completing the diploma, graduates can choose to enter the workforce or continue their studies at Management and Science University (MSU).

Through the Faculty of Business Management and Professional Studies (FBMP), students may progress directly into the second year of a bachelor's programme in the same or related fields, with the option of credit transfer.

Aligned with MSU College's aspiration to produce balanced, holistic and well-rounded graduates, the programme is supported by a strong entrepreneurial ecosystem and industry-embedded initiatives.

These elements further enhance students' soft skills and ensure that they are well-prepared to compete in today's and future job market.

Additionally, the School of Hospitality, Education and Business Studies (SHB) offers other programmes, including Early Childhood Education, Accounting and English Language Teaching (ELT).

MSU College is also MSU APEL Centre for potential candidates to take the APEL Aptitude Test as the non-conventional pre-qualification for entry into higher studies, in which MSU currently offers APEL A and APEL C at T-3 (certificate), T-4 (diploma), T-6 (bachelor's degree) and T-7 (master's degree) levels.

MSU College empowers students through its Diploma in Management, providing a comprehensive business education, practical industry exposure and essential soft skills for career success.

■ For more information about the programmes offered, call the college's team at 03-5521 6787, email enquiry@msucollege.my or visit *www.msucollege.edu.my*

Hands-on laboratory experiences help NUMed students develop the skills, expertise and perspectives needed to pursue a broad spectrum of professional pathways.

Opening doors to myriad opportunities

DID you know that a degree in medicine or biomedical sciences can open doors to a wide range of rewarding opportunities across healthcare, research, industry, education and beyond?

At Newcastle University Medicine Malaysia (NUMed), students are equipped not only with specialist knowledge but also with the skills and experiences needed to thrive in diverse professional environments.

For example, Bachelor of Medicine and Bachelor of Surgery (MBBS) students have the option to pursue intercalation studies.

"This gives them an edge in their chosen profession to enhance their skills or pursue a parallel interest, such as in research or medical education, as well as broadening their career options," said NUMed clinical affairs dean Prof Dr Harinarayan Radhakrishna.

BSc Biomedical Sciences graduates also enjoy a broad spectrum of career opportunities.

"They can work in clinical laboratories, research institutions, pharmaceutical companies, government agencies and healthcare organisations, in addition to pursuing further education in medicine, dentistry, pharmacy and other healthcare professions," explained Assoc Prof Dr Madihah Rushaidhi, who is the School of Biomedical, Nutritional, and Sport Sciences head and Biomedical Sciences dean.

NUMed helps students explore these possibilities through exposure to research, interdisciplinary learning and international experiences.

Students are encouraged to participate in research projects, collaborate with academics and industry partners, and develop critical skills that are vital in today's knowledge-based economy.

The university's global network further expands career horizons, providing students with access to international collaborations, professional connections and opportunities across different healthcare and scientific ecosystems.

This empowers them with the knowledge, adaptability and confidence to pursue a future filled with possibilities.

■ Visit NUMed's Open Day on Aug 15 for a first-hand glimpse of its campus and programme offerings. Find out more at *www.ncl.ac.uk/numed/study-with-us/get-to-know-us/open-days*.

Alternatively, for more information, visit *www.newcastle.edu.my*, email admissions@newcastle.edu.my, call 07-555 3800, or WhatsApp 011-1231 5411 or 012-784 9456.

(From left) University of Southampton Malaysia chief executive officer and provost Prof Ehsan Mesbahi addressing staff and students during a university engagement session; the university's campus in Iskandar Puteri, Johor, is home to a vibrant learning community bringing together students from Malaysia and around the world.

A vision to shape the future workforce

University of Southampton Malaysia's Strategic Growth Vision 2025-2030 to act as a catalyst for talent, innovation and industry collaboration

MALAYSIA is entering one of the most significant periods of transformation in its history.

Artificial intelligence (AI), advanced manufacturing, digital technologies and the green economy are reshaping industries at an unprecedented pace, creating new opportunities while redefining the skills needed for the future.

As the nation advances towards a more innovation-driven economy, universities must evolve just as rapidly to prepare graduates for a world where change is the only constant.

Responding to this rapidly changing landscape, the University of Southampton Malaysia (UoSM) has unveiled its Strategic Growth Vision 2025-2030.

This five-year roadmap reaffirms the university's commitment to developing future-ready talent, advancing impactful research and strengthening partnerships that contribute to Malaysia's long-term economic and social development.

The institution operates on the belief that changing minds changes the world, and it is that belief that underpins its Strategic Growth Vision and shapes how it educates, conducts research and works with industry, government and communities to create meaningful impact.

Located in Iskandar Puteri, Johor, UoSM is uniquely positioned to connect globally recognised academic excellence with Malaysia's national priorities and Johor's emergence as one of South-East Asia's most dynamic economic regions.

As the Johor-Singapore Special Economic Zone (JS-SEZ) accelerates investment in advanced manufacturing, digital infrastructure, healthcare, logistics and emerging technologies, the demand for highly skilled, globally minded graduates will continue to grow.

For UoSM, this presents not only an opportunity but also a responsibility.

UoSM provost and chief executive officer Prof Ehsan Mesbahi said that he believes higher education must move beyond its traditional role.

"Universities can no longer focus solely on awarding degrees. They must become places where talent is nurtured, ideas are transformed into solutions and partnerships create lasting value for society," he said.

"Malaysia's future competitiveness will not be determined solely by investment or infrastructure. It will be determined by the quality of its people, the strength of its partnerships and its willingness to embrace new ideas.

"Through our Strategic Growth Vision, we want to contribute meaningfully to that future."

Prof Mesbahi (front row, centre) with Prof Andrew Atherton (on his left), Wendy Appleby (beside Prof Andrew), alongside academics, professional services staff and students of UoSM, reflecting the university's close-knit community and its commitment to an inclusive, supportive, and globally connected learning environment.

Rather than focusing solely on institutional growth, the Strategic Growth Vision positions UoSM as a long-term partner in Malaysia's development by aligning education, research and industry with the nation's evolving priorities.

The vision reinforces the university's role as a bridge between global academic excellence and the needs of students, employers, government and society.

At the heart of this approach is UoSM's Triple Helix model, connecting education, research, and knowledge exchange and enterprise.

Through this model, education prepares graduates for meaningful careers; research generates mission-driven impact; and knowledge exchange links expertise to industry, government and communities.

A central priority of the vision is also to future-proof UoSM's academic portfolio.

The university will continue to expand programmes that respond to emerging skills demand in AI, cybersecurity, intelligent systems, advanced automation, biomedical and health technology, actuarial science, risk management and digital transformation.

Student success remains at the heart of the university's vision as UoSM believes every graduate should leave with more than an academic qualification.

They should graduate with confidence, curiosity, resilience and the ability to adapt to careers that continue to evolve.

Academic excellence must be complemented by leadership, global perspectives, digital capabilities and lifelong learning.

The university intends to strengthen its student support ecosystem through enhanced academic coaching, employability development, alumni engagement, well-being support and a proposed Graduate Passport model.

The Graduate Passport will provide students with broader access to professional certifications, digital credentials, global mobility opportunities, international exposure and career development pathways.

Over time, this will support UoSM's ambition to produce graduates who are employable, confident, mobile and prepared to lead in a rapidly changing world.

Research will continue to play a defining role in the university's future. Beyond producing publications, UoSM aims to generate knowledge that creates practical impact.

By bringing together researchers, policymakers, businesses and communities, the university seeks to develop solutions that improve lives while supporting Malaysia's innovation ecosystem.

Key research priorities include Artificial Intelligence and Intelligent Systems, Digital Health and Biomedical Innovation, and the proposed Johor Living Lab, creating opportunities for collaboration that address national priorities while strengthening regional innovation capacity.

Partnerships also remain fundamental to the Strategic Growth Vision.

UoSM will continue strengthening collaboration with industry leaders, government agencies, professional bodies, international universities and community organisations to enhance curriculum development, internships, applied research, consultancy, innovation initiatives and talent development.

These collaborations ensure graduates gain industry-relevant experience while enabling research to respond directly to societal and economic needs.

As Johor continues its transformation into one of South-East Asia's most dynamic economic corridors, UoSM believes universities must play an active role in supporting sustainable growth by developing the skilled workforce, innovative thinking and collaborative partnerships that will underpin Malaysia's future competitiveness.

Prof Mesbahi said the Strategic Growth Vision ultimately reflects the university's long-term commitment to Malaysia.

"Our ambition is not simply to grow as a university. We want to be recognised as a trusted partner in Malaysia's future – developing graduates employers seek, delivering research that makes a meaningful difference, and building partnerships that strengthen industries, communities and society," he said.

"At the UoSM, we believe that changing minds changes the world. Through our Strategic Growth Vision, we are reaffirming our commitment to preparing future-ready talent, advancing innovation and working alongside our partners to help build a stronger, more resilient and more prosperous Malaysia."

Counsellor goes global

THE School of Psychology and Social Sciences of IMU University is proud to celebrate the achievement of Master of Counselling (MOC) graduate Zahra Kazim Dhalla, who has successfully attained Registered Membership with the British Association for Counselling and Psychotherapy (BACP), the professional association for members of the counselling professions in the UK.

This accomplishment reflects both Zahra's dedication to professional excellence and the quality of education provided by IMU's Master of Counselling programme.

Zahra, a MC1/23 cohort, boarded a 17-hour flight from her home country Tanzania to Malaysia in order to enrol in the Master of Counselling programme as a full-time student in September 2023. She completed her studies in August 2025.

Her academic excellence and commitment to learning were recognised when she graduated with Distinction at IMU's graduation ceremony on Nov 1, 2025.

A rigorous path

The journey towards BACP Registered Membership involved a rigorous process. In March 2026, Zahra successfully met the requirements for BACP Individual Membership, made possible through the comprehensive curriculum and training offered by IMU's Master of Counselling programme.

The programme's academic and professional standards aligned with the requirements set by BACP, providing a strong foundation for graduates seeking the individual membership recognition.

Building on this achievement, Zahra then undertook the BACP Certificate of Proficiency, an assessment designed to ensure that practitioners meet the professional standards required for registration.

Zahra exemplifies how local postgraduate training equips students to address mental health needs globally.

In June 2026, she successfully passed the assessment and was officially awarded BACP Registered Membership.

The BACP is widely recognised as one of the leading professional counselling bodies globally and plays a role similar to that of the Malaysian Board of Counsellors in promoting professional standards, ethical practice and public confidence in the counselling profession. Becoming a registered member signifies that a practitioner has met recognised standards of competence and professionalism.

Zahra's journey at IMU was marked by both academic excellence and genuine personal and professional growth. Known for her diligence, collaborative spirit and active engagement, she developed strong counselling competencies while forming meaningful friendships and professional networks.

Nurturing global practitioners

As the counselling profession continues to evolve internationally, achievements such as Zahra's demonstrate how IMU graduates are well positioned to contribute meaningfully to the mental health and well-being of individuals and communities around the world.

At IMU University, the Master of Counselling programme is designed to nurture competent, ethical and socially responsible counsellors who are equipped to make a meaningful difference in the lives of individuals, families and communities.

Through a multidisciplinary approach, specialised training opportunities, community engagement and extensive practical experience, the programme prepares students to become reflective practitioners capable of supporting diverse populations in a rapidly evolving society.

Students of this programme can further enhance their competencies through elective modules and a research project, in addition to core modules.

This would enable them to deepen their understanding of areas that align with their interests and career goals.

The next commencement of this programme is in September. If you are interested to enrol into this programme, make an online application today.

■ For more information, visit *www.imu.edu.my* or email start@imu.edu.my or call IMU at 03-2731 7272.

Boost your English proficiency

IF you're reading this, your English is likely already quite good. You might be looking to improve your fluency or trying to help someone else learn. Either way, here are some ideas to make studying easier.

Start small and stay consistent

Tiny bits of information can quickly add up. Try learning just five new words each week – that's 260 words a year.

One simple method is classic memorisation. Write your five words on a piece of paper and place it somewhere you'll see often – by your bed, on the bathroom door or as your phone's screensaver. Read them twice a day for a week, and soon you'll know them without even trying.

Converse with yourself

You don't always need a partner or constant feedback to enhance your fluency. Engaging in brief, imaginary conversations can help you practise grammar, identify vocabulary gaps and experiment with sentence structure.

Whether you're in the car, taking a shower or enjoying a solo cup of coffee, try talking to yourself.

Learn common phrases

Building confidence starts with having ready-to-use expressions you can mix and match in conversation. Break down dialogues from textbooks and pull out useful phrases. Add these to your daily vocabulary list as part of your speaking toolkit.

Students at OUM's Faculty of Business and Management engage in collaborative learning that develops practical business skills.

Ready for tomorrow's job market?

WHETHER you are starting out after school or planning your next career move, one question matters most today: will your qualification keep you relevant in a fast-changing job market?

At Open University Malaysia (OUM), that answer is built into the way learning is designed. The Faculty of Business and Management (FBM) focuses on practical knowledge, flexible study options and real-world skills that help students prepare for both today's workplace and what comes next.

Students learn in a digital environment that reflects how modern organisations work – through online collaboration, independent learning and real-world problem-solving based on actual situations and data.

Faculty members mentor students through practical learning that bridges theory and workplace practice.

A pathway for every level

FBM offers study options that suit different stages of life and career. For those just beginning, diploma programmes provide a strong foundation in areas such as management, accounting and human resource practice.

For those aiming higher, bachelor's degrees open doors to fields including business administration, marketing, tourism, logistics and supply chain management, accounting and human resource management.

Each programme is designed to build solid business knowledge alongside practical skills that can be applied in the workplace.

For working professionals looking to advance further, postgraduate studies offer deeper expertise through programmes such as the MBA, Master of Management and Master of Human Resource Management.

At the highest level, doctoral programmes like the DBA and PhD in Business Administration allow students to specialise and contribute new knowledge to the field.

Across all levels, the goal is the same – to help students build skills that matter in real working environments, not just in exams.

Going beyond theory

At OUM, learning is not limited to reading materials or watching lectures. Students take an active role through discussions, problem-solving activities and real business applications.

A key example is the Strategic Management course, where students analyse real company cases, take part in structured online discussions, and defend their ideas in writing.

This approach strengthens critical thinking, communication skills and confidence in expressing ideas clearly.

Success in this environment depends on active participation. Students build discipline, manage their time well and contribute consistently throughout their studies. It also shows that quality business education does not require a traditional classroom.

OUM further strengthens future-ready skills through its compulsory Learning Skills for the 21st Century course, where students develop digital literacy, creativity, collaboration and confidence in using technology.

What employers want

OUM regularly updates its programmes based on employer feedback and changes in the job market.

When industry input highlighted the need for stronger practical experience, FBM responded by strengthening work-based learning, internships and short case-based assignments that connect theory with real workplace situations.

According to FBM dean Assoc Prof Dr Zahir Osman, the direction is clear:

"While general business qualifications remain valuable, future careers will require stronger knowledge in areas such as data-driven decision-making, digital business tools and supply chain management.

"Students are encouraged to combine their core studies with emerging areas like digital marketing or e-commerce to stand out in the job market."

Beyond the classroom, students also benefit from career support services, industry webinars and talks by business professionals that keep them connected to current trends and practices.

Learning with peers

One of OUM's strengths is its learning community. Many students are working adults who bring real workplace experience into class discussions, turning online learning into a space where ideas are shared, tested and improved.

Zahir says students should pair core business knowledge with skills in areas such as data analytics, digital business and e-commerce to remain competitive in a changing job market.

These discussions are guided by experienced e-tutors who support learning while encouraging independence and confidence.

To support students throughout their journey, OUM also provides programme guidance, technical support and ongoing encouragement to help them stay on track.

An FBM qualification represents more than academic achievement. It reflects a graduate's ability to learn independently, manage time well, work in digital environments and adapt to changing workplace demands.

For anyone looking to build a stronger career and stay relevant in a changing world, OUM's Faculty of Business and Management offers a flexible and practical pathway forward.

■ For enquiries on FBM programmes, contact 03-7801 2000, email enquiries@oum.edu.my or visit *www.oum.edu.my*

Uniting for innovation

MANAGEMENT and Science University (MSU) and Universiti Teknologi Malaysia (UTM) recently signed a memorandum of understanding (MoU) as a strategic initiative to strengthen smart collaboration in higher education, research, innovation, technology and talent development.

The MoU was signed by MSU president and founder Prof Tan Sri Dr Mohd Shukri Ab Yajid and UTM vice-chancellor Prof Dr Mohd Shafry Mohd Rahim, marking a new chapter in the strategic partnership between the two institutions, signifying a commitment to academic excellence, research advancement and human capital development.

Through this strategic collaboration, both universities will focus on the development of artificial intelligence (AI), virtual hospitals and cybersecurity, as well as exploring opportunities to implement dual-degree programmes.

The collaboration will also include joint research and development (R&D) initiatives, co-publications in high-impact journals and exchanges involving students, academics and researchers.

The partnership will further create greater opportunities and platforms for research, talent development and innovation that will benefit society, industry and the nation.

This collaborative network also reflects the ongoing commitment of MSU and UTM to strengthening the country's higher education ecosystem, particularly in interdisciplinary research and innovation, while providing opportunities for students and researchers to participate in high-impact projects.

Also present at the MoU signing ceremony were MSU's endowment and communications senior vice president Datuk Rosli Yusof, industry linkages and entrepreneurship senior vice president Prof Dr Abdul Jalil Ghazali, academic affairs vice president Prof Datin Dr Norhisham Mohamad and research vice president Prof Dr Norfilza Mohd Mokhtar.

Representing UTM were Faculty of Artificial Intelligence dean Prof Dr Mohd Naz'ri Mahrin, Corporate Communication Centre director Assoc Prof Dr Farhana Diana Deris and Research, Innovation and Development deputy dean Assoc Prof Dr Roslina Ibrahim.

Prof Mohd Shafry (left) and Prof Mohd Shukri signed the MoU to strengthen smart collaboration in higher education, research, innovation, technology and talent development between the two institutions.

Through the collaboration, both universities will focus on developing AI, virtual hospitals and cybersecurity, as well as exploring opportunities for dual-degree programmes.

CONGRATULATIONS!

MICPA x CA ANZ Excellence Awards 2026 - Graduates & Recipients

MICPA MALAYSIA | CHARTERED ACCOUNTANTS Australia • New Zealand

CREATE YOUR TOMORROW

The Council, Board, Management & Staff of The Malaysian Institute of Certified Public Accountants (MICPA) & Chartered Accountants Australia and New Zealand (CA ANZ) would like to congratulate all graduates & award recipients of our joint programme - the MICPA x CA ANZ Qualifying Programme. We are proud to celebrate your remarkable achievement and honoured to have graduates of your calibre become part of our professional community. We look forward to welcoming you as valued members in the near future.

A proud celebration of our graduates' achievements and their journey towards becoming future-ready accountants.

The Malaysian Institute of Certified Public Accountants (Reg No: 195801000106)
www.micpa.com.my | +603-2698 9622 | info@micpa.com.my
