

HARI Raya Aidilfitri holds a special place in Malaysia for several reasons, as it signifies the end of the holy month of Ramadan when Muslims fast. This Raya, Gintell offers a wide range of exclusive promotions and special offers, aimed at making this festive season even more memorable for everyone.

If you're looking towards investing in a massage chair during this festive season, then the Gintell S7 Plus second-generation 8 Hands Wellness Chair is the perfect massage chair for you.

The Gintell S7 Plus is the newest addition to the Gintell Wellness Chair Series.

The chair is fully enhanced with the second-generation 8-D Twin Rollers, which allows users to customise their preferred massage techniques simultaneously on the upper and lower back, for a deeper, more precise massage experience.

The Gintell S7 Plus is also the first intelligent dual massage track in Malaysia that signifies unique flexibility through its 178° L-Flex Track.

This design allows the massage chair to recline at a 178° lay-flat angle, where it can be adjusted towards the user's body curves for an intense massage that helps maintain proper posture while reducing strain on the back. The massage rollers can target the right nerves, especially on the upper back, lower back, and waist – leaving users feeling refreshed.

AI Fatigue Bio-Scan system

Another innovative feature is the AI Fatigue Bio-Scan system, where users can measure their heart rate, blood oxygen level

Relax and rejuvenate

and fatigue index by simply placing a finger on the biometric scanner for 30 seconds.

Based on these readings, the massage chair automatically starts a personalised massage programme suitable for the user's current index. The 230° Thai Massage full-body stretching programme incorporated in the Gintell S7 Plus is a full-body stretching programme which can be considered as a warm-up before an intensified massage.

This programme is fully endorsed, and consulted by Datuk Seri Master Chris Leong, a renowned Tit-Tar Master (bone setting specialist).

Making the massage chair recline at a 230° angle, supported by the 178° L-Flex Track and second-generation 8-D Twin Rollers, even enhances your joint flexibility and mobility. Additionally, the Gintell S7 Plus helps relieve muscle tension and promote relaxation, through its 360° Heat Spa Therapy, whereby the airbags are induced with warm compression located on the back, waist and feet. It also includes a cross-body strap designed for abdominal heating, providing relief from muscle spasms and menstrual cramps.

For improved sleep quality, Gintell S7 Plus offers three auto-programmes from the Brain Relief Therapy session: Total Relax, Mental Care and 230° Thai Massage.

These programmes gently calm nerves while soft, soothing background music plays throughout the massage session.

Users can easily control the Gintell S7 Plus with its enhanced AI Voice Control or touch screen controller via their smartphones through Bluetooth connectivity via the Gintell Super App OS application which can be downloaded from Google PlayStore and AppStore.

Overall, the Gintell S7 Plus second-generation 8-Hands Wellness Chair offers 20 automatic programmes, 11 unique massage techniques, adjustable massage speeds and 4D intensity up to five levels, a wireless charging port with USB connector, VI Memory programme and relaxing Zen Light, which enhances the user's mood and surrounding ambience.

Keep your skin healthy and moisturised

WHEN your body is dehydrated, one of the most obvious signs is parched skin.

This may cause fine lines, wrinkles and uneven skin tone, especially on the face – making you look tired. The solution is applying the right skincare.

Rilastil Aqua offers an innovative range of products providing effective moisturisation for users that lasts for hours.

Various active ingredients reinforce the skin's barrier, helping to lock in water.

Hyaluronic acid binds and retains water molecules, preventing excessive water loss that happens via the skin's surface through evaporation.

While naturally occurring in the body, the production of hyaluronic acid can fluctuate due to various factors such as age. Thus, it is important to ensure that its levels are sufficient to avoid dehydrated skin.

The formulation utilises two types of hyaluronic acid, low molecular weight and high molecular weight.

High molecular weight hyaluronic acid stays on the outer skin layer while low molecular weight hyaluronic acid penetrates deeper skin layers.

Using Rilastil Aqua products can help keep your skin moisturised.

Other ingredients of the Rilastil Aqua range are ceramide and oenothera oil, which can help with skin's dryness.

There is a distinct difference between dehydrated and dry skin.

While the two terms are often used interchangeably – leading to confusion, the simple explanation is that the former lacks water, and the latter, oil.

Rilastil Aqua products also contain vitamin E which works as an antioxidant to protect your skin. Additionally, the formulation's triple ceramide complex strengthens the skin's barrier and ensures fewer water molecules can escape through the surface, reducing skin water loss.

The Rilastil Aqua range is suitable for all skin types (even for sensitive skin) and can be used every day.

Rilastil Aqua Face Cleanser cleanses skin without altering its pH.

Its gentle formulation will leave your face feeling moisturised and soft.

If you are looking for a gel or cream to moisturise your skin, consider the Aqua Intense 72H. It refreshes like a gel, while at the same time, nourishes the same way a cream does.

The secret is the Hydraboost Moisturising Complex. Produced from vitamin B12, it stimulates cells within the skin layers to produce hyaluronic acid, as well as amplifying the water retention effect. This product has an ultra-light texture and is quickly absorbed. You can even apply it at work, just by patting over your make-up for that extra boost of hydration.

Soothe and moisturise

Try the Aqua Moisturising mask, which is a bestseller on online shopping platforms.

Use this cream mask twice a week as part of your nighttime beauty routine, or even during the day – if you need to rescue particularly stressed and dehydrated skin. It also has recovering and restoring properties to soothe skin after prolonged sun exposure.

Unlike sheet masks that provide only

temporary results, cream masks can last longer. For a cream mask, you can wash it away after 15 minutes or leave it overnight for a fresh look the next morning.

Founded in Italy more than 50 years ago, Rilastil is loved by dermatologists.

As a science-backed skincare brand, it combines both the knowledge and methods of the pharmaceutical industry – subsequently using the result to treat the skin.

Every batch of Rilastil's product has been tested free from heavy metals.
